**EXAMINER'S AMENDMENT AND REASONS FOR ALLOWANCE**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kevin Pillay on January 14, 2004.

The application has been amended as follows:

In claim 15, in the last clause after the words "said flow rate", insert - - wherein said speed control signal is a continuous variable speed signal. - -

Cancel claim 25.

2. The following is an examiner's statement of reasons for allowance: In view of the entry of the terminal disclaimer, the prior art of record fails to show or to suggest a method for controlling an oil well pump comprising of all the steps as presently claimed wherein said speed control signal is a continuous variable speed signal. The nearest related art is US 5,525,040 to Andrae et al. Andrae et al show all the steps but show that the signal is only a discrete on/off signal and thus does not anticipate that the control signal is a continuous variable speed signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
